## *Tired of Energy Drinks? Chew On This!*

Energy drinks are all the craze but how convenient can they really be? Without carrying around a can in your hand or a six-pack in your purse, you may not have the energy you need when you need it most. Thanks to modern technology and the genius of Andres Sasson, M.D., now you can find all the energy you need in a stick of gum with **VE2 Energy Gum**. After working crazy hours in the ER, Sasson realized he needed an extra boost. "A friend and I decided to

develop something more convenient and less expensive than energy drinks," he explains. "I wanted something that fit in my lab coat pocket, didn't need to be refrigerated, and didn't make me need to find a bathroom ten minutes later." The VE2 energy gum is packed full of energy-boosting ingredients, including vitamins B6 and B12, niacin, ginseng, and guarana, and is more rapidly absorbed into the body than a drink, increasing your alertness without the "crash" that accompanies most energy products. Perfect for partying late or working all day, two pieces of gum are equal to one 8-oz energy drink or one cup of coffee. VE2 is available at Fry's Electronics locations nationwide. *For more info visit: [www.ve2energy.com](http://www.ve2energy.com)*
